

AUTOMATED DOCUMENT DRAFTING SYSTEMABSTRACT OF THE DISCLOSURE

5           A system for automated drafting of a customized document, the system  
interfacing with a word processing application having a plurality of word processing  
functionalities and with a database having a plurality of data base functionalities, the  
system including a user interface and controller having a plurality of programming  
functionalities, the user interface and controller interfacing with a user by presenting  
10       a sequence of requests to the user so that the user provides information necessary to  
prepare the document, the user interface and controller communicating with the data  
base whereby the data base supplies data stored in the data base to the user interface  
and controller, the data being provided to the user interface and controller for  
providing a format for the requests to the user and for preparing text in the  
15       document, the user interface and controller and the word processing application  
communicating so that the user interface and controller controls the word processing  
application to prepare and generate the document, wherein the user interface and  
controller comprises a program for providing the sequence of requests to the user to  
obtain the information from the user for the preparation of the document and further  
20       for manipulating the document using the word processing application in response to  
the information received from the user, and further wherein the sequence of requests  
is dynamically altered by the program in response to the information provided in  
response to previous requests, the program determining the next request of the  
dynamically alterable sequence of requests to be provided to the user and when and  
25       how to manipulate the document.
